PeriXom™ CS

CoCr Covered Peripheral Stent System

Securing the Vessel,
Restoring the Flow

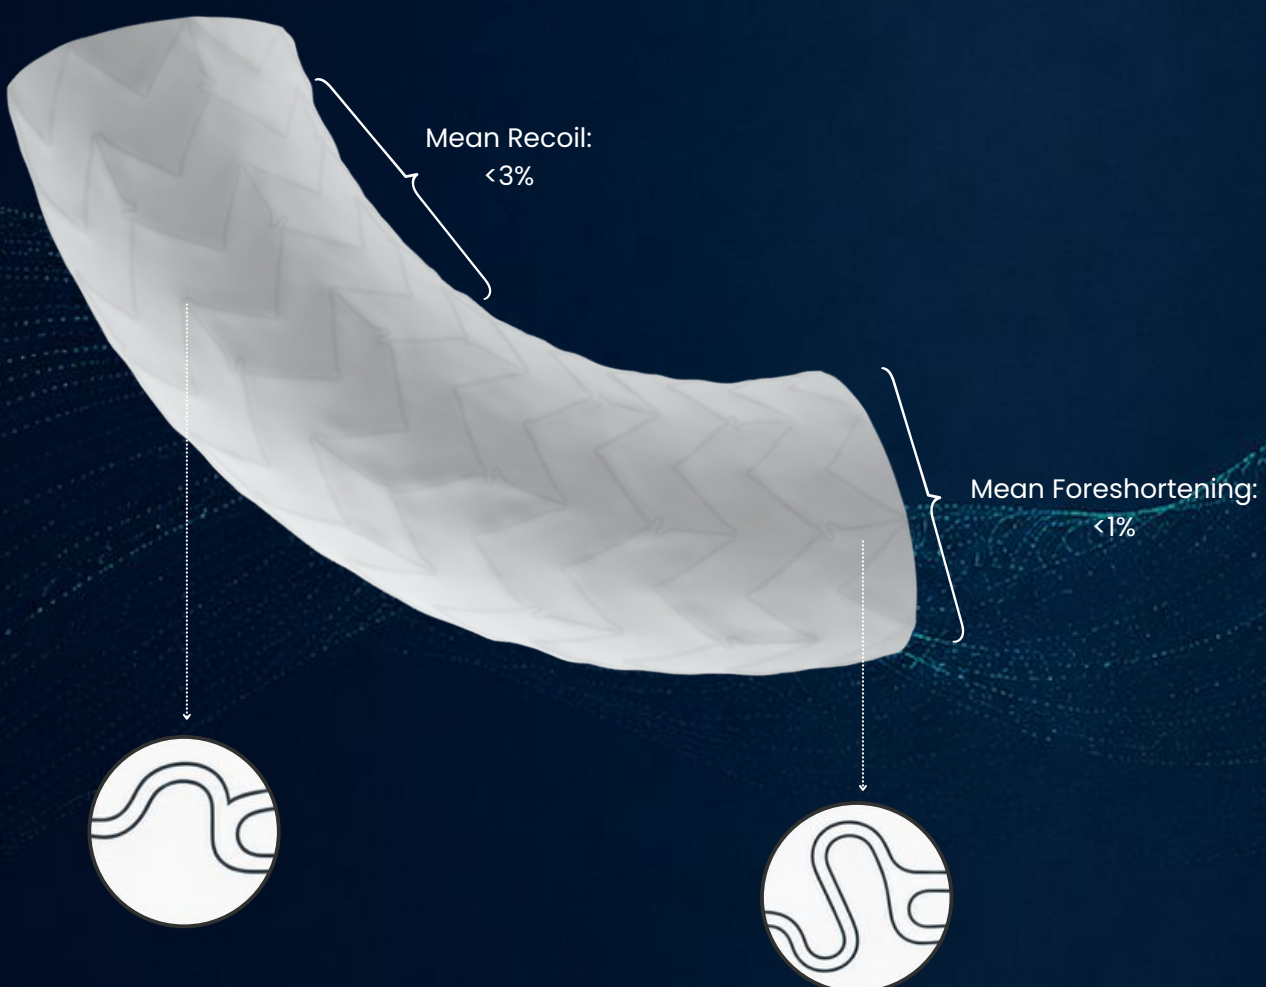

PeriXom™ CS

CoCr Covered Peripheral Stent System

- PeriXom™ CS is structured with highly radiopaque CoCr L605 material
- PeriXom™ CS incorporates an ePTFE on CoCr Stent surface through a cutting-edge sintering lamination technique

Proven microporous ePTFE designed to resist neointimal growth

Excellent implant conformability to the vessel anatomy

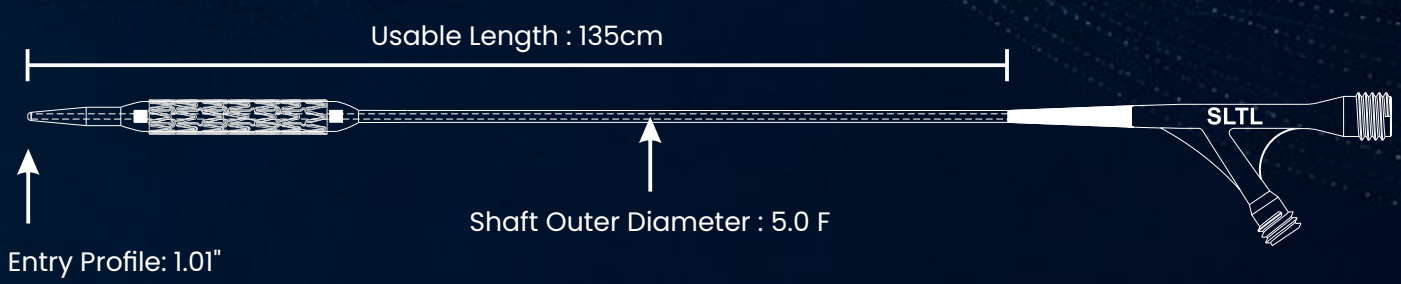

- "C" & "S" Shape flexible poly links provides high radial strength and minimizes stent foreshortening
- Lower strut thickness provides minimal crimping profile
